## ***DETAILED ACTION***

Claims 1-10 are pending in this application.

### **Election/Restrictions**

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Due to the numerous variables in the claims, e.g.  $R^1$ ,  $R^2$ ,  $R^3$ , X, Y, A etc and their widely divergent meanings, a precise listing of inventive groups cannot be made. The following groups are exemplary:

**Group I** claim(s) 4-6 and 9 (all claims in part), are drawn to compounds of the formula I and their wherein: **W is N; A is alkylene group; R1-R9** are as defined, classified in various subclasses of class 546.

**Group II** claim(s) 4-6 and 9 (all claims in part), are drawn to compounds of the formula I and their wherein: **W is C-halogen or C-CH<sub>3</sub>; A is alkylene group; R1-R9** are as defined, classified in various subclasses of class 546.

**Group III** claim(s) 4-6 and 9 (all claims in part), are drawn to compounds of the formula I and their wherein: **W is N; A is an alkylene group that have some of the methylene moiety is replaced with C=O or C=NH; R1-R9** are as defined, classified in various subclasses of class 546.

**Group IV** claim(s) 4-6 and 9 (all claims in part), are drawn to compounds of the formula I and their wherein: **W is C-halogen or C-CH<sub>3</sub>; A is an alkylene group that have some of the methylene moiety is replaced with C=O or C=NH; R<sub>1</sub>-R<sub>9</sub> are as defined, classified in various subclasses of class 546.**

**Group V** claim(s) 1-3, 7 and 8 , drawn to method of using compounds of Formula I, classified in various subclasses of class 514.

**Group VI** claim(s) 10 , drawn to a method of preparing compounds of Formula I, classified in various subclasses of classes 546 and 548.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, **this list is not exhausted**, as it would be impossible under the time constraints due to the sheer volume of subject matter instantly claimed. Therefore, applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and examiner will endeavor to group the same. **If applicant is unable to elect a single invention, applicant may instead choose to elect a specific compound and examiner will attempt to group it.** The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain

, which does not define a contribution over the prior art( see WO 00/35884). The substituents vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking and restriction of the invention in accordance with the rules of unity of invention is considered to be proper. Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter. The method of use and process of preparation will be examined together with the elected invention.

A telephone call was made to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
